

Equal access to the Internet—net neutrality—is a strong and requisite principal and policy that is necessary to ensure vibrant democracy, education, and innovation in the rapidly changing days ahead. Privileging wealth and corporate behemoths only reinforces the status quo and threatens future freedom, equity, and wellbeing in the United States. Restore and expand net neutrality.

The opposite of poverty is not wealth. . . .
In too many places, the opposite of poverty is justice.
We have a system of justice in this country that treats you much better
if you're rich and guilty than if you're poor and innocent.
Wealth, not culpability, shapes outcomes.
— Bryan Stevenson
